March:

- Pad Drive

April:

- April Holiday Sessions
- Magazine Launch

June:

- Podcast Launch

August:

- Coffee Ministry Partnership
- August Holiday Session

December:

- Web Development Bootcamp
- December Holiday Session

● Pad Drive and Mentorship

1. Was held at the New Life Intergrated MC Brothers Primary School in Katwekera, Kibera on 28th March 2025.
2. We mentored 94 students (35 girls and 59 boys).
3. We engaged the students in an interactive Q&A session.
4. We distributed 90 pads to the girls and their female teachers.
5. The Q&A session brought rise to the Podcast

We aimed to educate the students on puberty, understanding body changes during puberty, how to use menstrual products and maintaining hygiene during puberty.

Podcast and Digital Training

Social Media and Digital Media Training

This year, our focus expanded beyond inspiration into execution. Through digital media training, online safety education for young social media users and hands-on tech and creative programs, Code Crucible is equipping participants with practical, market-relevant skills. From coding fundamentals and content creation to storytelling and responsible digital citizenship, our initiatives are designed to prepare young people not just for employment, but for leadership in the digital economy.

The Unmuted Podcast

Steve Mwangi

I am deeply proud of what we have built together in such a short time. What started as a simple idea to create a space where young people could learn, create and be seen, has grown into a living community of curiosity, discipline and possibility. This first year has been defined by learning, resilience and collective effort from our learners, volunteers, partners and supporters. Thank you for believing in the vision and walking this journey with us. As we move forward, our commitment remains clear: to nurture talent, amplify local voices and turn potential into real, lasting impact.

● Holiday Bootcamps

Code Crucible Tech Hub successfully hosted intensive holiday bootcamps designed to equip young participants with practical, future-ready skills in a focused and supportive environment. The bootcamps blended technology, digital media, and online safety training, enabling learners to move beyond theory into hands-on creation, collaboration, and problem-solving. Participants explored coding fundamentals, responsible social media use and creative storytelling while building confidence, discipline and teamwork.
